## PROJECTS

### Fundraiser Project

- The main concept of the project is the interaction between the user and people when a user need fund he will request through fund-form which involves Admin in a significant way. If conditions are satisfied and posted on the application and people raise the fund.

### Blood-India

- The concept of the project is the interaction between the user and hospitals and blood banks .if user want to donate or required a blood.The user will send request through application and the request submitted to all Registered hospitals and all bloodbanks.all the admins of bloodbanks and hospitals will see the application. They will check the requirments through the application and they will accepted the application.If application is accepted and send message through the email.

### Online Groups

- Admin will post the different types of groups. The user can see the different types of groups Uploaded by the group admin and user sends the request to admin and admin will accepts the Request. The user can Upload the post and keeping post private or public and sends the request to admin. Admin checks the post is violence or Non-violence and accepts the requests.
